

lancashire & south cumbria health authority

One of the most extensive Multi-Discipline Team networks in the country was installed for the Lancashire & South Cumbria Health Authority

Using the N3 network, MDT seminar rooms throughout the region were linked together. The hospitals on the network included Royal Preston Hospital, Furness General Hospital, Royal Lancaster Infirmary, Burnley General Hospital, Royal Victoria Hospital Blackpool, Blackburn Royal Infirmary and Chorley General Hospital

Each seminar room was comprehensively fitted out with presentation equipment and very high quality projection systems suitable for Radiology and Pathology imaging

X-ray viewers, Pathology Microscopes, PACS and other patient record information systems were all integrated to allow viewing both locally and remotely by the other MDT's in the group and achieved through the use of high quality video conferencing equipment and the N3 network
